COMPANY PROFILE

Superior services through
constant innovation

*Simply
Trust Us.*

GM Message

From the beginning, we understood the need to enhance transportation services and the struggle to fulfill the individual client's requirements. After almost 6 years of success, Xtra Link Transport's drive to achieve a superior level of service remains intact. We continue to seek ways to continuously improve our services and to be at the forefront of innovation.

Passion for delivering exceptional customer service.

With our corporate restructuring now well under way, we embark on a new phase of growth and development. Our internal capacity has been greatly increased through the hiring and training of numerous new employees at all levels of seniority and in all positions.

Bringing together years of rich experience in the scope of supply potable water business along with a sizeable fleet, equipped comprehensively with a wide range of well-maintained transportation equipment and vehicles to ensure a high quality, efficient and prompt service to its clients.

Our quest for excellence will continue as we aim to be the first choice for all companies in need of sweet water transportation, TSE water and collection and disposal of industrial waste according to Abu Dhabi municipality guidelines.

On behalf of the Xtra Link transport management and our teams, I would like to thank our clients for their continued trust and support and we look forward to delivering outstanding service to them in the coming years.

General Manager

About Us

Founded in 2016 in order to provide an emergency water service to a local construction site in Abu Dhabi market, Xtra link Transport has grown over the years to become the leading provider of alternative and emergency water supply services in the United Arab Emirates. Providing bulk potable water supplies through tankers, we support several industries with our variety of services.

During this journey of growth, Xtra link transport has expanded and opened a new line of business in the waste management services to provide integrated waste management and recycling solutions in the emirate of Abu Dhabi. Our approach is focused on providing the most sustainable solutions to manage waste across all sectors of the economy from commercial to industrial sectors.

XLT has expanded to offer assured support services to numerous utility companies, Oil & Gas industry, Marine, construction, transport, Government, and private individuals. The company prides itself on a unique industry pedigree, and the unrivalled level of quality assurance provided with its services.

A recent growing awareness for business continuity planning has created increased interest in our water supply contingency planning services and disaster recovery solutions. XLT is uniquely placed to provide bulk water supplies with our range of services including Waste Management collection & disposal services to customers in all sectors.

Our Vision

To drive a sustainable development, paralleled with the correct business ethics in order to become the leading supplier of potable water in the UAE.

Our Mission

We at Xtra Link Transport have chosen to mirror our mission as follows;

- To provide our clients with superior services through constant innovation by focusing on the growing demands on the quality.
- To be keen on creating a long – term relationship with our clients by providing excellent services at the best price.
- To be reliable and flexible in the terms of produce & service delivery regardless of our client's project tenure and value.

Why Choose Us

The company aims to maintain and grow its high profile in the market by:

- Maintaining service excellence
- Providing superior transportation solutions according to each client's
- Treating staff and customers with respect and honesty.
- Increase the efficiency of our customers, provide excellence in working conditions
- Safety shall be the first consideration in all operations.
- Developing new and innovative ways to safely and cost effectively transport materials.

Our Services

Our Strength is our ability to handle the challenging work environment to improve the business by client relations.

Sweet / Potable Water Tanker Services

We're experts in planned and emergency water services, local wide 24/7. We offer a wide range of drinking water supply services wherever and whenever you need it. We can provide tank fills and a range of on-site services, bulk drinking water tankers, bowser and tank hire and other solutions to a variety of sectors.

Given the diversity of our fleet, we are able to provide vehicles to carry out any job you need to be done. All operators are trained and qualified with certification to safeguard the hygiene of the work at all stages of the work.

Xtra Link operates the largest commercial directed drinking water tanker fleet in the emirates of Abu Dhabi as the fleet consists of 40 water tanker trucks, that has the capability to deliver up to 500000 Gallons daily and regularly support Governmental companies in the event of loss of supply to their customers in households and commercial and industrial properties.

Our fleet of dedicated potable drinking water tankers can deliver up to 4500 to 14500 Gallons per load and provide water transport solutions for any situation or emergency. Where access for large vehicles is an issue, we can also deliver smaller volumes of water using our 3000 Gallons by 2*2 truck.

"Whether your job is one load or multiple loads, one day hire or 24/7 running, we have the tankers and drivers to safely deliver your requirements

TSE Water Tanker Service

Xtra Link provides TSE water for agriculture and irrigation purposes, water is an essential part of maintaining agricultural land. Irrigation is the practice of providing a consistent water supply to plants, crops, foliage and grass due to lack of rains as well as the keenness of the country to utilize the recycled resources.

We have specialized trucks to carry out this water and are certified by the authorized entities in the emirate of Abu Dhabi. Xtra link transport has a professional team that handles this task with efficiency.

Waste management Services

Established in 2017 Xtra link is one of the fast-growing Waste Management Services companies in United Arab Emirates licensed by Abu Dhabi Waste Management Center (TADWEER) with Permit No# PMT-21-20564.

The company adds value through the entire lifecycle of waste disposal and recycling of all classes of waste; provides and integrates products and services, starting from waste segregation at source, waste collection, proper packing moving through waste transportation to final waste disposal, treatment, infrastructure, and abandonment.

Xtra Link resources are utilized to perform the Integrated Waste Management services to achieve the best proposed scope of work which includes and not limited to the following:

- Concrete Blocks
- Ceramics
- Concrete Waste
- Wood Waste
- Excavated material
- Asphalt waste
- Metal & Nonmetal waste
- Organic & Food waste.
- Recyclable waste collection (Paper, Plastic, Tyres etc.).

Due to the company's large fleet which consist of more than 15 trucks 35 CBM, Xtra Link is considered as the leading company in transporting the large quantities of concrete, debris, and excavated material from: -

- Construction sites.
- Demolition sites.
- Precast factories
- Ready-mix Plants.

By using the large 35 CBM trucks, we can pass on significant savings to our customers via reduced collection charges which make us always unique in this service and assist us to build a strategic relationship with our clients as well as big waste management companies.

Industries We serve:

"TAKE IT FROM US, INDUSTRY IS THIRSTY"

- Xtra Link is an industrial water supplier. One sector which readily springs readily to mind as a major user of bulk water, is construction & Infrastructures Projects.
- Concrete manufacturing & Ready-mix plants for example uses lots of water and Xtra Link steps up to the plate, as well as the smaller capacity concrete manufacturing on site will also often prefer a more compact water vessel.
- Manufacturing industries need large volumes of bulk water for daily operations.
- We even load water onto ships performing maintenance and repair tasks offshore. Our water ends up back where it came from, in the sea!
- Another thirsty industry is the landscape where water is used to flush the unwanted slurry.
- Having procedures in place for an unexpected interruption to your water supply can mean the difference between continuing your business as normal and making a significant loss of profit and productivity.
- Festivals and events are a recurring feature and as we are the leading temporary water supply company in the country, Xtra Link services many different types of events , as an organizer, ensuring the quality of your drinking water supply is crucial to ensure the health and well-being of visitors. Our services include a variety of ways to provide water for events, including water bowser and static tanker hire, water tankers.
- Labor Camps also use bulk quantities of water for daily labor use
- Facilities Management works & swimming pools filling.

In an instance where your water supply is unexpectedly interrupted, we can help by pre-empting what kind of temporary solution would best suit you and your company's needs with our water supply continuity and disaster recovery system. A site visit can help us decide what would be suitable, whether that be a water tanker remaining on site to pump water straight into your system, to fill storage you already have on site or to provide temporary storage tanks to supply your site until a clean mains supply has been reinstated.

Quality

WE SUPPLY ONLY QUALITY ASSURED, WHOLESOME DRINKING WATER

What does this actually mean and why is it important?

Quality assured means that the water has been maintained during every stage of the process from Loading, to storage and delivery.

Our tankers have only ever been used for drinking water and we use only drinking-water-approved equipment and fittings, each tanker employed is uniquely identifiable by Abu Dhabi Distribution Company (ADDC) permit, and a maintenance, movement, filling and discharge record are available for each.

مجلس أبوظبي للجودة والمطابقة
ABU DHABI QUALITY AND CONFORMITY COUNCIL

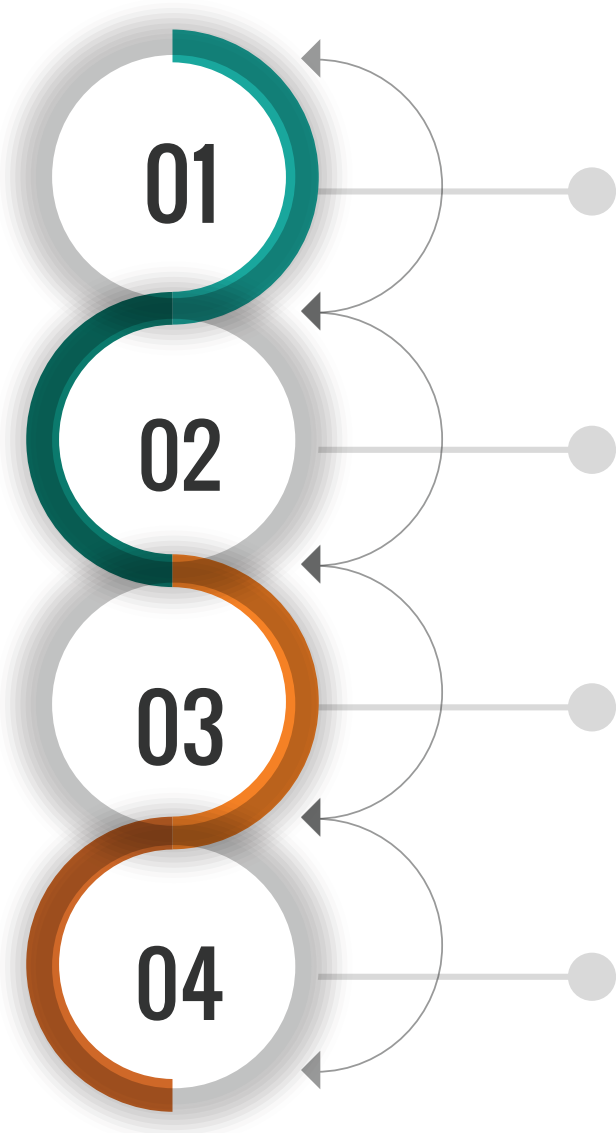

Wholesome drinking water means water that is suitable for human consumption as defined in law, by specific parameters for a wide range of substances, including micro-organisms, chemicals (such as nitrate and pesticides, Free chlorine , pH...), metals (such as sodium and copper), and the way the water looks and tastes, thus each tanker is subject to examination before permit issuance or renewal from ADDC by sending a sample of the tank water for laboratory testing to Abu Dhabi Quality and conformity Council.

The water we supply is potable and has been loaded from Abu Dhabi distribution stations using hygienic practices with appropriately licensed equipment that complies with the Water Supply Regulations.

Health & Safety

Xtra Link transport consider health, safety, hygiene and security to be the fundamental in all our operations.

Xtra Link Transport is committed to eliminating occupational injuries, accidents and illness and also is aiming towards the highest level of awareness which is basically performed through fostering continuous improvement by implementing

All employees are required to conduct activities based on the prevention of risks and the protection of their health and safety.

We maintain zero accidents during our tenure and we always assure to follow all HSE standard with our potential business partners to maintain the high level of health and safety awareness.

Xtra Link Transport assures to send any new appointed drivers to obtain an HSE certificate before starting his job.
